

Thank You for Your **LUXSENSE SUPPORT!**

GETTING STARTED IS QUICK AND EASY — JUST FOLLOW THESE TWO STEPS:

I. DOWNLOAD THE LUXSENSE APP

📲 Scan one of the QR codes below to download the app or search for our app within your app store:

IOS

ANDROID

Once installed, open the app and:

1. Accept all requested permissions
2. Enter your **Registration ID** (provided with your order)
3. You'll then be taken to the main menu

II. POWER ON AND PAIR YOUR LUXSENSE SENSOR

🔌 Plug in the power adapter; the display will step through startup messages:

- “Powering up ...”
- “Sensor: [device type]”
- “LuxSense Version [x.x.x]”
- “LuxSense Device ID [Lux..]”
- “LuxSense Device Name [Name Your Sensor]”
- “Sensor can now connect to your LuxSense app”

Then, in the LuxSense app:

1. Go to Settings menu option
2. Follow the in-app instructions to pair your sensor
3. New sensors will appear as UNASSIGNED in your list
4. You'll need your valid WiFi credentials to complete setup

📞 If you need help at any point, our team is here for you.

LuxSense WineSentry –

The Guardian of Your Vinous Treasures

To ensure accurate performance, please place your WineSentry device in your wine cellar under your ideal temperature and humidity conditions. WineSentry will use these initial environmental values as its target settings.

CALIBRATION PERIOD:

WineSentry will spend the first 30 minutes calibrating. During this time, we recommend leaving the sensor undisturbed.

DAILY NOTIFICATIONS:

Each day around 12:00 p.m., you'll receive a notification with the current temperature and humidity readings from your cellar.

UNSCHEDULED NOTIFICATIONS:

If the current readings deviate by more than $\pm 10\%$ from the target for more than 20 minutes, WineSentry will send an unscheduled alert.

NOTIFICATION LIMIT:

To prevent excessive alerts, WineSentry will send a maximum of 5 unscheduled notifications before requiring a manual restart.
